## Front-End Developer

Full time position

Location: Hanoi, Vietnam

Report to: Head of Software team

Blacksheep is a fast-growing international science and technology company – a great place to develop your career in Vietnam. Focusing on development of world leading products for high growth markets, the company designs, develops and manufactures truly innovative products in Vietnam. Our projects in Vietnam range from high power electric motorbikes to medical machines, and our products are used for many scientific applications including biology, chemistry, biotech research, material sciences and scientific discovery and all need to follow ISO standards appropriate for the resulting products.

Our objective is the intention of pioneering the development of Vietnamese designed, developed, manufactured, and marketed cutting edge products with world leading performance and quality to be sold in global markets. We are looking for highly energetic people to join us to drive Vietnamese engineered products to the world.

### Main tasks:

Your role involves software development throughout the entire project life cycle (including website architecture, design input, site layout/user interface, database design/programming, website security), with a **focus on UX/UI** of website and mobile.

Your typical duties include but not limited to:

- Design user interface for websites and mobile apps
- Create new website layout from provided design concepts by using standard HTML/ CSS practices.
- Collaborate with designer and project manager to understand technology requirements and business objectives as they relate to the website development.
- Diagnose, detect, and resolve problems.
- Research, and propose ideas to improve technical issues.
- Perform integration with CRM system and a range of other online and software functions including the use of API.

### Required skills and capabilities:

- Bachelor's degree in computer science or related field.
- 1+ years of experience as a Web Developer.
- Experience in front-end development: HTML, CSS, JavaScript, etc

- Full professional proficiency in English.
- Good analytical and problem-solving skills.
- Strong organization skills to manage tasks within the constraints of timelines.
- Excellent communication skills.
- Ability to work efficiently within a team or independently without supervision.
- Willingness to accept challenges and learn new things.

**Nice to have, but not required:**

- Experience with UI/ UX Design
- Knowledge of data structure and algorithms
- Knowledge of a modern JS framework (VueJS, ReactJs, etc)
- Experience in CMS such as WordPress.
- Solid understanding of web development processes, from the layout/ user interface to relational database structures.
- Experience in E-Commerce is a plus

**Benefit:**

- Opportunity to work in an international, friendly, creative, and active environment.
- Opportunity to approach most advanced technology in the world.
