Bioinformatics Analyst

Full time, 37.5 hours per week
Location: Hanoi, Vietnam

Blacksheep is a fast-growing science and technology company – a great place to develop your career in Vietnam. Focusing on Productizing Science®, the company designs, develops and manufactures truly innovative, premium quality scientific products. Our projects in Vietnam range from high power electric motorbikes to medical machines, and our products are used for many scientific and commercial applications including biology, chemistry, biotech research, material sciences and scientific discovery and all need to follow ISO standards appropriate for the resulting products.

As big data grows fast in various fields, biology discovery progress has also been accelerated by technology. One of our jobs is analyzing the bioinformatics data generated by our sequencing machines and deriving biological meanings behind the words and numbers. We are looking for enthusiastic science lovers to join us to drive Vietnamese products to the world.

Duties will include but are not limited to:

- Assisting the Project Manager with all aspects of pipeline design and coding.
- Attending and contributing to company development meetings.
- Writing and maintaining code.
- Analyzing customer data
- Giving customers technical support as needed
- Conducting development tests
- Writing technical tutorials for both basic and advanced audience

Required skills and capabilities:

- A bachelor's degree in **either** Bioinformatics **or** Computer Science **or** Biology (Molecular Biology, Biomedical Science, Health Technology, Biotechnology) or another related field.
- Working knowledge of Bash, R and/or Python.
- Basic programming experience.
- Good English and Vietnamese communication skills, including oral and written
- Ability to work in a well-organized way
- Ability to learn new software and technologies quickly.
- Ability to follow instructions and work in a team environment.
- Detail-oriented.
- Willingness and enthusiasm to pick up new tools and techniques
- **Priority of agility to learn new rather than deep existing experience, with ability to demonstrate this in some way**

Previous useful experience:

- Masters or PhD qualification in the field
- Deploying code on Github and AWS
- Analyzing any kind of biological data for research purposes (NGS data preferred)
- Academic writing

Benefit:

- 20 casual leave days/year
- Private health insurance
- Opportunity to work in an international, friendly, creative, and active environment
- Approach to most advanced technology in the world
- Opportunity to collaborate with world leading engineers
- Competitive salary and benefit package

If you would like to apply for this position, please email your covering letter addressing each of the requirement and CV to: **admin@blacksheeppower.com** attention to **Ms Giang Nguyen, Operations Director**

We look forward to hearing from you!
