

Junior Manufacturing Engineer

Location: Hanoi, Vietnam.

Report to: Production Manager.

Blacksheep is a fast-growing international science and technology company - a great place to develop your career in Vietnam. Focusing on development of world leading products for high growth markets, the company designs, develops and manufactures truly innovative products in Vietnam. Our projects in Vietnam range from high power electric motorbikes to medical machines, and our products are used for many scientific applications including biology, chemistry, biotech research, material sciences and scientific discovery and all need to follow ISO standards appropriate for the resulting products.

Our objective is the intention of pioneering the development of Vietnamese designed, developed, manufactured, and marketed cutting edge products with world leading performance and quality to be sold in global markets. We are looking for highly energetic, men and women to join us to drive Vietnamese engineered products to the world.

Main tasks:

- Involved directly in manufacturing projects and implementation of plans.
- Assemble all assigned products strictly following the assembly and production process.
- Control the quality of all components manufactured by various suppliers; report to the project manager strictly following the quality control and reporting process. Manage the warehouse products for each project and update daily.
- Weekly update project schedules to project managers and production team, including expenses, timelines, and man efforts.
- Report any problems or issues with the components or products immediately to project managers for proper solutions.
- Perform other relevant tasks when assigned.

Required skills and capabilities:

- University degree (Technology university is preferred)
- Fluent in English
- Good at using office software and computers.
- Ability to use basic tools in manufacturing.

- Ability to work in a well-organized way.
- Ability to work in both individually and as part of a team.
- AutoCAD and 3D Design software (Creo, CATIA, NX...) skill is preferred.
- Proactive and quick learner, willing to take on challenges.
- Hard working and diligent.

Benefit:

- Opportunity to work in an international, friendly, creative, and active environment.
- Opportunity to approach one of the most advanced technologies in the world.
